TERMS OF ACCEPTANCE

When a patient seeks chiropractic care and we accept such a patient for care, it is essential for both to be working towards the same objective. Chiropractic has only one goal. It is only when the patient understand both the objective and the method that will be able to attain it. This will prevent any confusion or disappointment.

An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments to the spine.

Health is a state of optimal physical, mental and social well being, not merely the absence of disease.

Vertebral Subluxation is a misalignment of one or more of the joints of the body. This can cause pain or alteration of nerve function and interference of the transmission of nerve impulses, lessening the body's innate ability to maintain maximal health.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal evaluation, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area. Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. **OUR ONLY PRACTICE OBJECTIVE** is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxation.

I have read and fully understand the above statement. Any questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction. I therefore accept chiropractic care on this basis.
